## All These Apps...Now What??

### RESEARCH:

-Just because you saw it at an awesome conference or saw it on 60 Minutes doesn't mean that it is right for you!

Some things to Consider:

- What is the goal? What skill/task you are trying to target? Does the app actually target that skill/task?
- Watch YouTube videos to get a better sense of how the app actually works and what it does.
- Although reviews are great, remember that many of them could have been written by people associated with the company.
- Look for a Lite version of the app. This will give you a better feel for the app before you purchase.
- Talk with people on the TEAM to get their input on the appropriateness of the App.
