

# NO TECH? NO PROBLEM!

## Low Tech Communication Strategies

Stephanie Soule, M.S., CCC-SLP,  
ATP  
Communication Therapist  
Cotting School

# What does Low Tech mean?

- Easy to make

- Easy to use

- Cheap

- (Mostly) Unplugged

# General Considerations

**Level of individual's physical functioning**

**Progressive nature of disability over time**

**Access method (direct selection, scanning, eye gaze)**

**Portability**

**Durability**

**Integration/consistency with other communication systems...Is it a secondary to a high tech device?**

# General Considerations

**Expressive, receptive, social language skills**

**Cognitive skills**

**Ability to recognize symbols \***

**Literacy skills**

**Level of support needed to use a communication system**

# Using Symbols

“Not all students need symbol supports. Just because you are an AAC user does not mean symbol supports are necessary when beginning to read.

The current research in AAC suggests we don't have to follow  
object + photo + symbol heirarchy.”

-Pati King DeBaun, 2006

# Using Symbols

“Things do not need to be taught in a hierarchy. You can pair things together. Just as children are able to say words, oftentimes they will say words before they necessarily use them for meaning. You can pair those items together, but you do not have to teach the symbol before the child can use it to communicate. They will learn to use it to communicate as they are being taught.”

-Pati King DeBaun

# Using Symbols

Symbols should be available and accessible for children.

In the natural environment as much as possible

If not, they will not be used.

Educatoressentials.com

# Using Symbols

Fading symbols and using text as early as possible encourages literacy skills

“Symbols are for communication. Text is for reading.”

-Karen Erikson

(2015)

At school, we sometimes

line up.

We line up to

go

to the

gym, to

go

to the

library,

and to

go

out to recess.

Sometimes my

friends

and I

get

excited

when

we

line

up, because we're

going

someplace

fun,

like

out to

recess.

It is

okay

to

get

excited,

but

it is

important to

try

to

walk

to the

line.

Running

can

cause

accidents,

and my

friends

or I

could

get

hurt.

I will

try

to

walk

to the

line.

# More considerations...

## Efficient

Is it easy to access? How will the student access it?

## Consistent

Is it consistently available? Does the student have a consistent method to use it? Do others respond to it in a consistent manner? Is it facilitated in the same way everytime?

## Reliable

Can it be relied on? Is the student's ability to use it reliable?

No matter the system...

There must be **RESPECT** and  
**VALUE**

for the form of communication in  
order

for it to be successful.

# Getting Started

Look at the daily routine and for various opportunities to communicate. Keep a log for 1 full week.

*“There’s More to Life Than Cookies”*

*(Light & Drager, 2007)*

Produce an age appropriate vocabulary list:

Brainstorm Core & Fringe vocabulary

# Core vs. Fringe Vocabulary

85% of spoken language in English is comprised of 250-350 words

This is GREAT news for our AAC users!

Core Vocabulary:

- applies across setting
- primarily pronouns, verbs, descriptors
- very few nouns
- consistent location of vocabulary

Fringe Vocabulary:

- specific to a task or activity
- and everything else!

## DLM™ First Forty Core Words

|       |          |      |           |
|-------|----------|------|-----------|
| I     | like     | not  | want      |
| help  | it       | more | different |
| who   | she      | you  | he        |
| where | up       | on   | in        |
| me    | make     | get  | look      |
| what  | need     | are  | is        |
| some  | put      | all  | this      |
| don't | that     | go   | do        |
| when  | finished | can  | here      |
| open  | turn     | stop | over      |

What form will it take?

Yes/No Systems

Communication  
books

Picture Exchange

Conversation books

Topic Boards

Core & Fringe  
Language Boards

Choice Boards

Letter/Spelling Board

How will they access it?

Writing

Direct Selection

Partner-Assisted  
Scanning

Eye Gaze

Morse Code or  
Braille

Where does it have to go?  
(hint: Everywhere)

Bathtub/Bathroom

Pool

Sandbox

Bedtime

Horseback riding

Mealtimes

Around Unfamiliar partners

# Partner Assisted Scanning

## Directions

When you can't figure out what I need, you can ask me questions in order so I can tell you how to help me. Please read the choices in order. When I say yes, turn to the page and read me those choices in order.

Start with the **BLUE** page on the other side.

1. something hurts/  
positioning
2. You don't understand
3. communication device
4. please check my  
equipment
5. something with the  
laptop
6. I don't understand
7. Food and Drink
8. Something Else
9. DISNEY

# A word on Aided Language Stimulation

Teaching approach that models use of the AAC system by using the system in the same way as the desired outcome.

AKA: What makes this all work!

Really hard to learn French if you've never been around anyone speaking French.

Create a script that you are comfortable with

Model the language with the visuals

High tech, Low Tech, or No Tech...they all require A.L.S

This is just a start...

Be where the communication  
is.

Be creative.

Try it out!

Have fun!
