MassMATCH Assistive Technology Regional Centers

www.eastersealsma.org

@eastersealsma

The Assistive Technology Regional Centers (ATRCs) help people with disabilities in Massachusetts make informed decisions about assistive technology (AT) they can use to increase their independence at home, on the job or in school.

The centers share the Easterseals Massachusetts mission of ensuring that children and adults with disabilities have equal opportunities to live, learn, work and play.

Increasing access to assistive technology for individuals with disabilities

How does the Device Demonstration Program work?

At the centers, individuals and groups can explore hundreds of high and low tech devices that can meet a variety of needs. From simple to sophisticated, Easterseals MA has the technology for you.

The centers are conveniently located on South Street in Boston, one block from South Station, and on Main Street in downtown Worcester. Contact the ATRC Coordinators to schedule a tour or assistive technology demonstration and learn about free assistive technology workshops or in service trainings.

How does the short-term device loan work?

The process is simple! It's like a lending library, only instead of books, you can take home the equipment and try it out for up to four weeks! Requests for loans can come from you, a family member, friend, advocate or someone who is helping you with your assistive technology needs, such as a therapist, teacher or rehab center. Complete a loan request form and get the technology you need today.

Hundreds of devices are available in the areas of communication, education, hearing and vision impairment and daily living.

These programs are FREE.

Funded by the Rehabilitation Service Administration (RSA) of the U.S. Department of Education under the AT Act of 1998, as amended in 2004.

ATRCs lead the Commonwealth's efforts to implement the provisions of the federal Assistive Technology Act of 1998, as amended. The Device Demonstration and Loan programs are part of the MassMATCH Massachusetts Assistive Technology Act Program.

The purpose of MassMATCH is to get AT into the hands of people with disabilities through programs that provide increased access and acquisition to AT.

Assistive technology is any item or piece of equipment used to maintain or improve the capabilities of people with disabilities. AT can help people with disabilities participate and be more independent in school, at home, in the workplace and in the community.

MassMATCH assists individuals with disabilities, family members and disability-related providers, agencies and organizations across the state with getting AT.
